

**Technology Demonstration Project of Department of Science and Technology (DST), Government of India and HelpAge India:**

HelpAge India has been implementing a Technology Demonstration Healthcare Project for Elderly Persons which is funded by the Department of Science and Technology (DST), Government of India (GoI). The project started in Shimla district of Himachal Pradesh and FourX4 was associated in the model building project of IT based health care services from the very beginning. Four X 4 conducted the baseline survey in the identified five locations and created an IT model for online tracking of health care services availed by the elderly persons. The project was reviewed for extension by the DST in February 2011 and after the review the project not only received “excellent” rating from the DST but also received a two-year extension.
